

Analyze the current CyberSathi repo.

- Summarize current architecture, modules, and dependencies.
- Identify technical debt, missing integration points, and weak design areas.
- Create a prioritized enhancement plan (Epics → Tasks → Acceptance Criteria).
- Output a table with timelines (Week 1–12).
- Generate folder restructuring plan for modularization:

/backend

/frontend

/infra

/docs

/tests

- Define core services: chatbot, nlp, integration, admin, notifier.

Output: "CyberSathi_RefactorPlan.md"
