Objective: Redesign CyberSathi UI for admin dashboard and awareness portal.

Tasks:
1. Audit /frontend/src components and improve layout using Tailwind + shadcn/ui.
2. Add pages:
 - Dashboard (complaints overview)
 - Case Tracker (by reference ID)
 - Awareness Center (cyber safety tips)
3. Add multilingual toggle (English Odia).
4. Design reusable React components:
 - ComplaintCard, StatusBadge, AlertModal
5. Add Figma-style design spec in docs/ui-spec.md.

Deliverables:
- Updated React components & routes
- styles.css using Tailwind best practices
- ui-spec.md with component tree
